

Franco Garcia

WEB Developer

ABOUT ME

Experienced Full Stack Developer in the industry, with a focus on user experience and code efficiency. I excel in problem-solving, critical thinking, and communication skills, allowing me to work effectively in agile and collaborative teams.

The technologies I work with in Frontend are ReactJS, NextJS, JavaScript, TypeScript, Tailwind, MaterialUI, HTML, and CSS.

In Backend, I work with NodeJS, ExpressJS, SocketIO, MySQL, and SQLite. Additionally, I have experience in performance optimization, scalable design, and best practices in software development.

Work Experience

WorkIn - 2021

Front End Developer

Remote, Argentina

August 2021 - September 2023

I developed solutions for a business software built with ReactJS. It was my first job and the one where I learned the most. We used technologies such as React, JavaScript, HTML, CSS, and TailwindCSS.

The job was on-site and part-time, from Monday to Friday

Facill App - 2023

Frontend Developer

Remote, Colombia

September 2023 - October 2024

- Collaborated on the development and maintenance of the frontend of a business management software.
- Collaborated on the implementation of new features and improvements to the user interface to optimize the customer experience.
- Technologies such as React and Material UI were used to create modern and responsive interfaces.

Facill Ecommerce - 2024

Frontend Developer

Remote, Colombia

October 2024 - November 2024

- In charge of the development and maintenance of the frontend of a video sales website.
- Implemented technologies and functionalities to improve the user interface and optimize the customer experience.
- Technologies such as NextJS, TypeScript and Material UI were used to create modern and responsive interfaces.

Freelancer on Upwork

Frontend Developer

Remote

November 2024 - February 2025

I develop short-term projects for clients around the world. With technologies like React, NextJS, Tailwind, HTML, CSS, JavaScript, TypeScript. With 100% of jobs completed and 5 stars on each one, my profile is

https://www.upwork.com/freelancers/~019bdc5a3dee5f5bc5?mp_source=share

Trainer Page

FullStack Developer

Remote

February 2025 – March 2025

I was in charge of the planning, development, and implementation of a website for selling personalized muscle-building plans for a famous trainer. The Frontend was developed in NextJS with TypeScript and Tailwind as the styling framework. The Backend was developed with NodeJS using an Express.js server, integrating APIs for the payment gateway and email delivery.

JustGym App

FullStack Developer

Remote

March 2025 – Actually

I developed a management and administration software for a local gym, which I offer as a SaaS product. I used TypeScript for both the Frontend and the Backend. On the Frontend, I used React with NextJS and Tailwind, and on the Backend, I used NodeJS with Express, integrating a PostgreSQL database.

Knowledge
